

## Powder Coating

A full range of powder coatings are available to meet all your specialist powder coating requirements in high volume batch work to 1 off units. As arguably the most important part of your process, PPC has a very flexible pre-treatment process designed to give the highest possible quality.

PPC can offer all types of specialist coatings to meet requirements other than cosmetic finishing. The company was established over 10 years ago and operates from a convenient location with direct access within minutes to the M65 motorway. Over the years we have built a reputation for quality, service and fast turnaround of items, sometimes in a few hours. The key to our success is our ability and flexibility to respond to customer requirements.

We offer a wide range of different specialist finishes which can include, if required, shotblasting

/stripping of items and masking. Epoxy coatings and polyester coatings feature hard, abrasion-resistant properties to provide an attractive finish which make them ideal for such applications as shopfittings, handrails and lighting boxes etc.

## Quality

At PPC, your finished products will meet or exceed your requirements. We carefully examine your product at every stage of production. Continuous monitoring during production ensures a quality, consistent finish.

Our pre-production inspection eliminates problems before they occur. Post-production inspection determines that each part meets or exceeds your expectations.

Testing Services (Adhesion, Cross Hatch, Thickness) are standard.

Delivery inspection ensures that each product is carefully and securely packaged so your shipment arrives in perfect condition.

## Typical painted components

Retail displays and shelving  
Office Furniture and Screening  
Partitioning, Wall Storage  
Flat Pack Furniture - Drawer Fronts  
Cabinet Carcasses - Wallboards/Displays  
Display Equipment - Picture Frames

## Welcome to MSM Fabrication

MSM Engineering Ltd is the product of over 24 years of engineering skill and expertise contributed by its key personnel and has been providing a first class service to industry since 1985.

### The complete package

We fabricate all types of metals, ferrous and non-ferrous, including aluminium, titanium and hastalloy. A turn key service can be provided from the original design to final delivery. Additional services required such as powder coating/painting, galvanising, polishing, assembly, commissioning and final assembly can be completed in-house.

MSM Engineering works with our customers in partnership, from design conception to satisfactory completion of the project.

Our work is produced to the highest engineering standards by skilled time-served tradesmen including welders and mechanical fitters. Our tradesmen have a wealth of experience in delivering the contract requirements of clients from a broad range of industry sectors.

### MSM Engineering will design, manufacture and install the following types of fabrications:-

- Design/autocad Service
- High volume fine precision components
- Stainless steel work stations
- TPM production stations
- Information towers
- Handrails
- Building entrances
- Conveyor systems
- Flooring (Metal)
- Guards
- Barriers
- Specialists fabrications
- Batch work / Bespoke components
- Titanium jigs
- Staircases
- Fire escapes
- Walkways
- Gangways
- Disabled access ramps
- Gates and Railings
- Pipe supports
- Platforms
- Canopies
- Ladders
- Balustradings
- Lifting beams
- Prototype components

Amada HFE 100t x 3mtr

We are equally capable of operating from our fully-equipped fabrication workshop or on-site at client premises. Our customers include Architects, aerospace industries, medical and food industries, Construction companies, Facilities managers, Colleges, Local government plus many other manufacturing companies and research organisations. We can assist with design to optimise functionality and cost-effectiveness.

### Quality

MSM will meet or exceed your requirements. We carefully examine your products throughout the production process, to ensure that consistent quality is achieved. We are working towards CHAS and ISO9001/8, to maintain constant quality control.

### Capabilities

- General fabrication - Bending - Punching
- Welding (Tig, mig, ark, cutting) - Laser cutting
- Spot welding - General machining - Polishing
- Powder coating - Galvanising - Shot/bead blasting

## Over 24 years of engineering skill and expertise

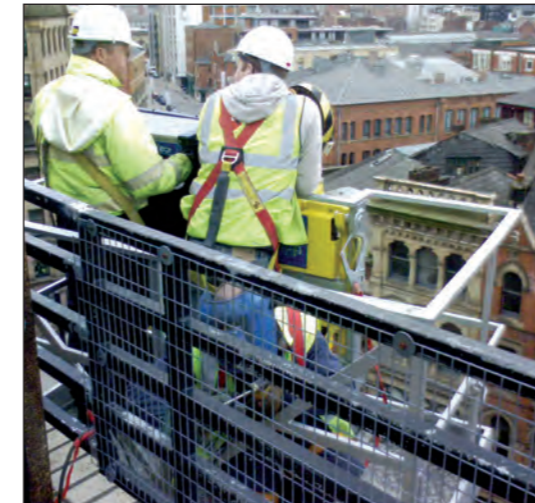

Acoustic chamber

## Operating from our fully-equipped fabrication workshop or on-site at client premises

Skilled fabricator

### Pendle Powder Coating (PPC)

Powder coating is a durable, protective and aesthetically acceptable coating available in an immense range of colours, including metallic and other speciality finishes. Even the most complex items present no problems to this spray on coating. PPC has specialised in the powder coating, pre-treatment and wetspray industry for over 10 years.
